DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 7-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Linhares et al (US # 6,030,377). Linhares discloses a marking system that includes a catheter having an elongated member with a passage (90) extending from the distal end to the proximal end of the catheter. The passage is open at the distal end. There is radiopaque material at the distal end. The device also includes a rod (94) with a piston (54''') at the end of the rod where the radiopaque material is carried by the piston.

Claims 7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Waksman et al (US # 5,683,345). Waksman discloses an apparatus (see figure 8B) that includes a catheter having an elongated member with a passage (220) extending from the distal end to the proximal end of the catheter. The passage is open at the distal end. There is radiopaque material at the distal end (22) in a second passage (216) that is closed at both ends.

Response to Arguments

Applicant's arguments with respect to claims 7-10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
